Congratulations!

We wish you lots of fun with your new Nordisk tent!

Spread out the tent. Slide the poles through the color coded pole sleeves. Ensure all doors are closed.

Ensure an even surface without any sharp objects!

E

Fix the ends of the poles using the sockets and pull the fly sheet tight. Secure the tent to the ground by attaching pegs into the webbing loops only at one end of the tent, starting with the end facing the wind.

**F**

Pull the webbing loops in the end towards you and walk backwards to erect the tent. Mount the remaining pegs to the ground.

**NORDISK®**

4

Secure the tent by attaching the guy ropes to the ground. Depending on weather conditions judge how many guy ropes that are needed. In stormy weather the tent must be securely anchored. Adjust webbings and guy ropes for correct tension.

Mount the inner cabin in the O-rings and hooks. When you pack the tent, you can choose to leave the inner cabin attached.

**5**

If you want you can erect the front door as a sun shelter by using the two included extra tarp poles.

Trek·Camp·Live

– take care of your Nordisk tent!

Before Trek

- build up the tent from home and **check if everything is ok.**
- **know the environment** you'll go to (sand, hard soil, snow), and check that pegs etc. matches this
- consider to bring along a **footprint**
- **check that the poles are ok**, and if not; buy a new set before you go
- **bring along a repair kit** incl. an outer tube for poles and tape for broken seams etc.
- make sure the **tent is clean**
- ensure that **zippers runs smoothly** (if not, get some silicone spray)
- if trekking in very wet conditions, **seal the seams** with a seam sealer, but check if it is SI or PU
- do not overfill your packsack as you might need the **extra space** during the trip
- **optimize weight** by leaving pegs, inner cabin etc. at home if it's not needed on the trip
- **compress the packsack** as much as possible

In the Camp

- make sure you **pitch on an even surface**. Some models depends on this for optimal ventilation
- **do not camp in too high grass** if you want floor level ventilation
- **remove sharp rocks and sticks** that could harm the tent floor (i.e. use footprint)
- **stretch the tent as much as possible** for optimal strength and water repellency
- if wet or very windy, you need to **re-adjust the tension of the guy ropes**
- if very windy, **use extra guy ropes and pegs** for stability
- **put the packsack somewhere where you can find it** again (i.e. mesh pockets inside the tent)
- **avoid fire and smoke** near the tent – be aware of wind directions!
- keep an eye on **guy rope tension** once in a while
- the pack sack is a little bigger than necessary in case of an emergency pack down
- **remove all traces from your camp**

Living with your tent

- **keep it clean** by hosing it after use, if very dirty. But don't use high pressure
- **clean it with a soft sponge**
- use **no harsh chemical cleaning** or machine washing
- **keep it dry**, and if packed down wet, remember to dry it as soon as possible – remember that a wet tent is heavier than a dry one
- **check guy ropes and pegs** once in a while, and buy new ones if damaged
- if you have **damaged poles**, your local Nordisk dealer can supply new ones
- be aware that long **exposure of sunlight can degrade the fabric**
- if you want floor in your apsis, you can **purchase a tailored footprint**
- love and nurse your tent. **If you protect your tent, it will protect you**

NORDISK®

Tips & Tricks

- 1 When you open a door, you can fold and store it, in the mesh pockets found near the door.
- 2 You can adjust the height and the ventilation, just by pulling the webbings found near the poles.
- 3 You do not have to use the inner cabin in the tent – it can be pitched just as a shelter.
- 4 Attach or detach the small cabin whether you need it or not.
- 5 You can open the front door and use it as a tarp or as an exit/entry extension.
- 6 The pack sack is made a little bigger than necessary in case of an emergency pack down – you can adjust the pack size with the tension buckles.
